TECHNICAL SKILLS

LANGUAGES

Python SQL

CORE CONCEPTS

OOP Data Structures
Algorithms DBMS
Operating Systems
Computer Networks

DATABASES

MySQL Oracle DB

TOOLS & TECH

Git GitHub Node.js
n8n REST APIs JSON
Linux VS Code

LANGUAGES

Nepali Native
English Professional

SOFT SKILLS

- Problem Solving
- Teamwork & Communication
- Analytical Thinking
- Adaptability
- Time Management
- Fast Learner

INTERESTS

- Artificial Intelligence
- Backend Development
- System & Database Design
- Open Source & Automation

PROFESSIONAL SUMMARY

BSc CSIT student with a strong foundation in Python, object-oriented programming, databases, and backend development, gained through hands-on academic and personal projects. Passionate about building reliable, well-structured software and exploring Artificial Intelligence and backend systems. A fast learner who thrives on solving real-world problems, seeking an internship where I can apply my software development skills, contribute to meaningful projects, and continue growing as an engineer.

EDUCATION

BSc Computer Science & Information Technology 3rd Semester
Ambition College, Kathmandu

Higher Secondary Education (+2 Science)
Nobel Academy

Secondary Education (SEE)
Aadarsha Secondary School, Ilam

PROJECTS

Hospital Management System
Python · OOP

Modular hospital management application with classes for patients, doctors, appointments, and medicine records.

- Patient & doctor management
- Appointment scheduling
- Medicine management
- Data validation, clean architecture

Library Management System
Python

System to manage books, borrowing, returns, due dates, and fine calculations.

- Book availability tracking
- Borrow / return workflow
- Due date calculation
- Fine calculation logic

Invoice Generator
Python · JSON

Invoice generation app with product validation, VAT calculation, and JSON-based storage.

- Automatic invoice generation
- VAT calculation
- JSON export
- Input validation

Rock Paper Scissors Game
Python

Console-based game implementing game logic, user interaction, and score tracking.

Password Generator
Python

Secure random password generator with customizable length and character sets.

EXPERIENCE

Independent Software Projects Ongoing
Continuously building personal and academic software projects while strengthening backend development and artificial intelligence skills.

ACHIEVEMENTS

- Completed multiple end-to-end software development projects using Python.
- Actively learning backend development and AI technologies.
- Maintains and version-controls projects using Git and GitHub.
- Strong academic foundation in databases, networking, and operating systems.
